Outlook

During the year FY 2020-21, India despite stiff lockdowns, reverse labour migration, supply chain disruptions, a resultant deep GDP contraction, still did well to recover to the path of economic recuperation and f2 841.92 r-3( )-68(a)-4(n)6(d)-2( l(p)7(e)-4(r] TJ ET4(i)-

protocols, the economy would once again recover back with the resumption of near normalized activity in sectors like agriculture, manufacturing, mining, construction and non-contact based services.

The investment focussed Union Budget 2021 and the growth supportive measures taken by the Government viz. increased allocations for capital expenditure under the NIP, the expanded production-linked incentives (PLI) scheme, FDI policy, and the ease of doing business will only reinforce the process of economic revival. The support by a credit expansive interest regime will provide further fillip to the investment climate.

Elsewhere, most parts of the global economy is gradually recovering from the impact of the Covid-19 pandemic, but it still continues to remain uneven across countries with economic activity in many countries still below pre-Covid-19 levels. On the positive side, large scale vaccination drives, sustained accommodative monetary policies, government stimulus packages to citizens and small businesses support a vastly improved global economic outlook for 2021. The hardening of energy and metal prices only confirms this view.

In the backdrop of the Covid-19 pandemic and the resultant challenging economic environment, the Company while upholding the primary dictum of maintaining the health and safety of its personnel will continue to aggressively pur1 386.23( )11(p2 T4(n)3 841.92
