

Larsen & Toubro (L&T), an Indian multinational engaged in Infrastructure, Hi-Tech Manufacturing and Services with decades of distinguished proficiency in these domains augmented its commitment to Saudi Arabia's vision of a more diversified and self-sustaining economy by enhancing its focus on providing comprehensive solutions to its customers.

L&T today expanded its hi-tech manufacturing capability, inaugurating a new state-of-the-art, advanced Heavy Wall Pressure Vessel facility in Saudi Arabia, that mimics L&T's bespoke capabilities in India, as a part of the IKTVA initiative of Aramco and Saudi Vision 2030, to enhance local content.

Speaking on the occasion, Mr. Subramanian Sarma, Whole-Time Director & Sr. Executive Vice President (Energy) said " We believe this is another significant milestone for L&T in the Kingdom and a strong testimony to our commitment to the development of the region. We wish to express our gratitude to Aramco for their guidance and support in the Kingdom, and special thanks to Royal Commission Jubail for partnering with us in this journey. "

Abdulkarim A. Al-Ghamdi, Sr. Vice President, Project Management, Aramco said " The L&T Heavy Wall Pressure Vessel facility will play a crucial role in helping us meet the global energy sector demand while pro
